

**CPSC 689: Introduction to Pattern Recognition
Texas A&M University
Fall 2008**

PEER REVIEW FORM

Project title: _____

Your name: _____

As discussed in class, your final grade on the project will be weighted by your overall participation, as measured by your team members. Please evaluate your team members on the basis of (1) their effort (e.g., number of hours) devoted to the project, (2) their technical contributions to the project, (3) their dependability to get their portion of the work completed on time, and (4) their overall grade. You are also asked to rate for yourself according to these measures.

Please use a rank between 0 (very poor) and 5 (excellent). A rank of 0 will be assumed for blank entries.

Team member name	Effort devoted	Technical contribution	Dependability	Overall grade
Yourself				

Are there any praises or issues that you would like to bring to my attention?

Please return to Dr. Gutierrez in room HRRB 520A.
